## About Me

I'm Facundo Arroyo, recently awarded my Computer Technician high school diploma and starting tertiary career as Networks and Cybersecurity Technician. I stand out for my aplomb and flexibility at work. I'm eager to learn and delve into what I do. I consider myself empathetic and skilled at overcoming obstacles. In group settings, I can easily adapt to new environments or situations, being sociable and friendly.

## Proyects

2023

### Training, development and maintenance of website

In the last year of high school we did an internship in which we were trained to develop and maintain a website

HTML

CSS

JavaScript

React

MySQL

2023

### Network video game development

Make a network racing video game, using only Java and a framework called LibGDX. Despite being a fairly simple game, I had to learn independently how to create it with libgdx and then implement the networking part that was explained to us and couple it to our code. The game had different screens, whether loading or levels, and an aesthetic that complemented the idea

Java

LibGDX

2022

### Data Managment Software Development

I made a program for a fictitious company in which I had to collect data to understand what type of software the employee needed, create a model, analyze the data path, create a database and create a user manual for the use of the software. . This program had a database that could be stored on a server and an interface with which the employee interacted to have better management of all the data and files that were handled in the company.

Visual Basic .NET

MySQL
